Our Purpose: Increase Inspection Capabilities

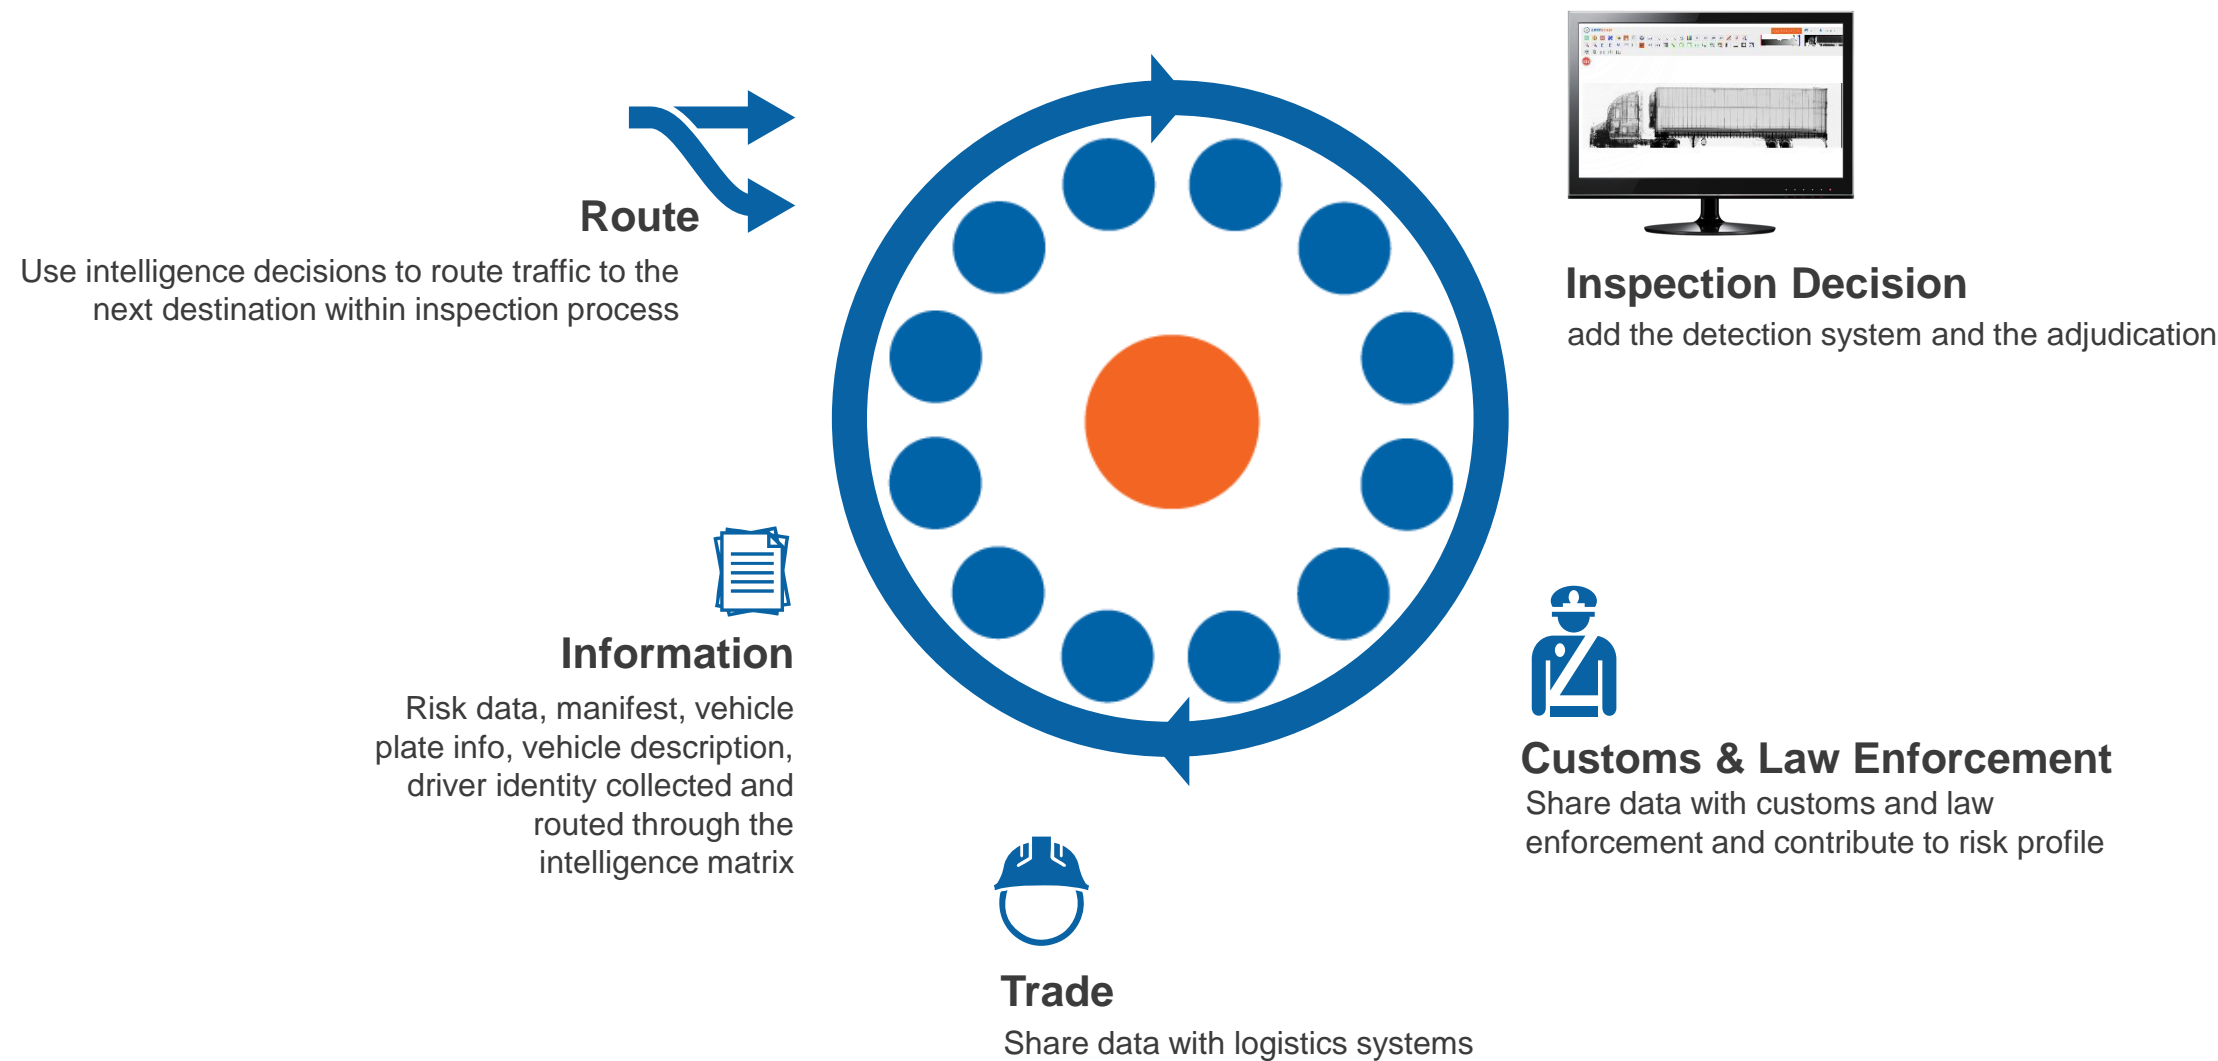

Current Inspection Processes are Based on
Old Capabilities

Result:
Ability to scan less than 5% of cargo and vehicles

Operations in Sync Result in Increased Capabilities

Integration + Training Decreases Inspection Time with Better Decisions

Real Data, Not Simulations

S2 Global uses images and data from real-world inspection situations – not simulations.

Expert Certified Trainers with Operational Experience

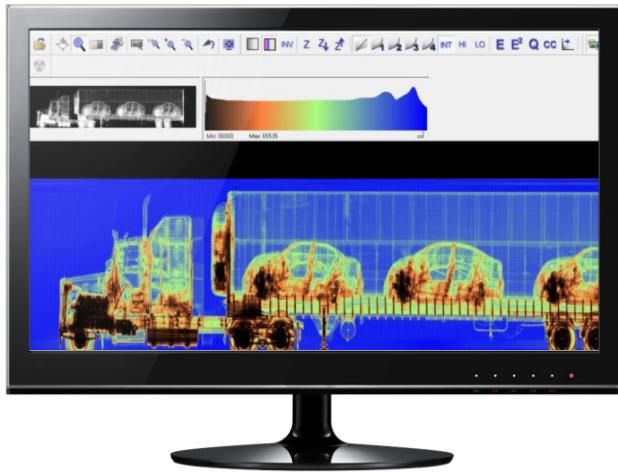

S2 Global instructors have decades of experience operating security systems.

End-to-End Approach

S2's learning management system and course library offers holistic solutions.

- Screening Operations
- Screening Technology
- Image Analysis & Interpretation
- Loop 'Lessons Learned' into Recurrent Training
- Service & Preventative Maintenance

The result: trained personnel with increased inspection capabilities.

Impact

Facilitate More
Trade

Scan a Much Larger
Percentage of Vehicles

Increase Detection

Increase Collection

S2 Global Flagship Projects

Puerto Rico – Puerto Rico Port Authority (PRPA)

- Full turnkey integrated non intrusive solution
- 5 seaport scanning sites
- All image analysis is performed on the scanning site
- Proprietary training and CertScan operational software
- Site design, build, operations, maintenance, staffing, training, image analysis, all done by S2 Global

Mexico – Mexico Customs Authority (MSAT)

- Full turnkey integrated non intrusive solution
- +25 scanning sites at seaports and land borders
- All image analysis is performed remotely on our proprietary nationwide network.
- Proprietary training and CertScan operational software
- Site design, build, operations, maintenance, staffing, training, image analysis, all done by S2 Global

Albania – Government of Albania

- Full turnkey integrated non intrusive solution
- 1 seaport and 4 land border scanning sites
- All image analysis is performed on the scanning site and also sent to the S2 Global CertScan RAC
- Proprietary training and CertScan operational software
- Site design, build, operations, maintenance, staffing, training, image analysis, all done by S2 Global

Thank you
