Israel Ministry of Public Security

Ministry of
Public Security

Personal safety, public security

Dr. Gad Frishman – Chief Scientist

Ministry of Public Security – Information & Knowledge Services (2019)

About the Ministry

Founded in 1948 as the Ministry of Police and renamed the Ministry of Public Security in 1995.

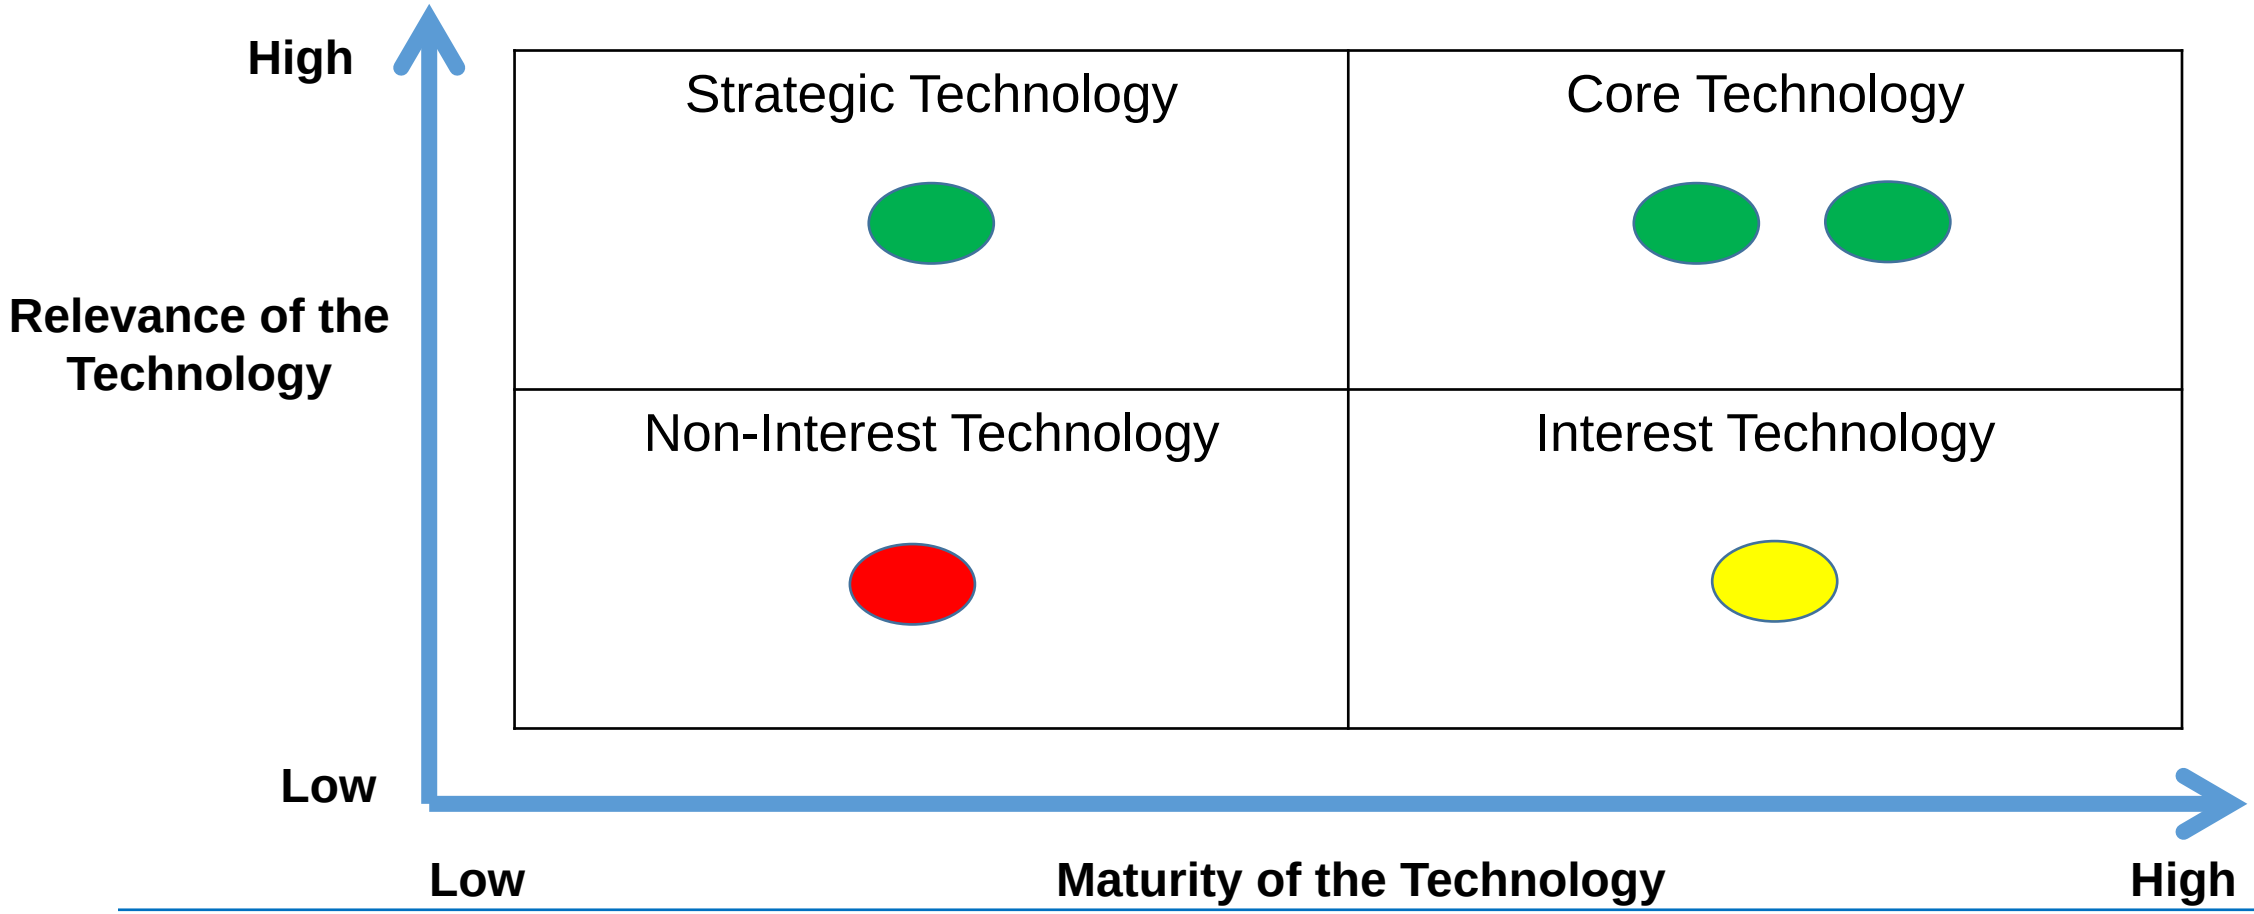
The Minister's main areas of responsibility are:
public security, law enforcement, and corrections.

Mission

Serving as the primary arm of the Israeli government for:
Law enforcement
Crime and violence prevention
Public order and protecting the public
Fire rescue & prevention
Incarcerating and rehabilitating criminals
Witness protection
Prevention and reducing drug & alcohol abuse
Firearms licensing

Ministry of Public Security

Technology Policy



Controlling Urban Spaces

- Automatic detection of violence, disturbances and hazards
- Early alerts of natural disasters
- Alerting about violence and crime
- A unified control center, fusing information from various sources and integrating sensors

Public Disorder – Solutions

- Ability to neutralize aggressive, violent and dangerous people by use of non-lethal weapons
- Ability to manage large scale riots and public unrest
- Multifunctional armored vehicles for use in riots
- Alternatives to the Taser, featuring: Long distance, accurate targeting, that can temporarily disable an individual within a crowded area

Security Checks

- Remote detection capability for a wide range of weapons on a person or his belongings
- Non-invasive detection allowing minimum disturbance and maximum flow capacity
- Handheld scent and vapor detection device for narcotics and explosives, including smuggled items within the body

Israel Border Crossings Challenge

Brigadier General Efi Havivyan
Senior director of Border Crossing Division
National Security Council
Prime Minister Office

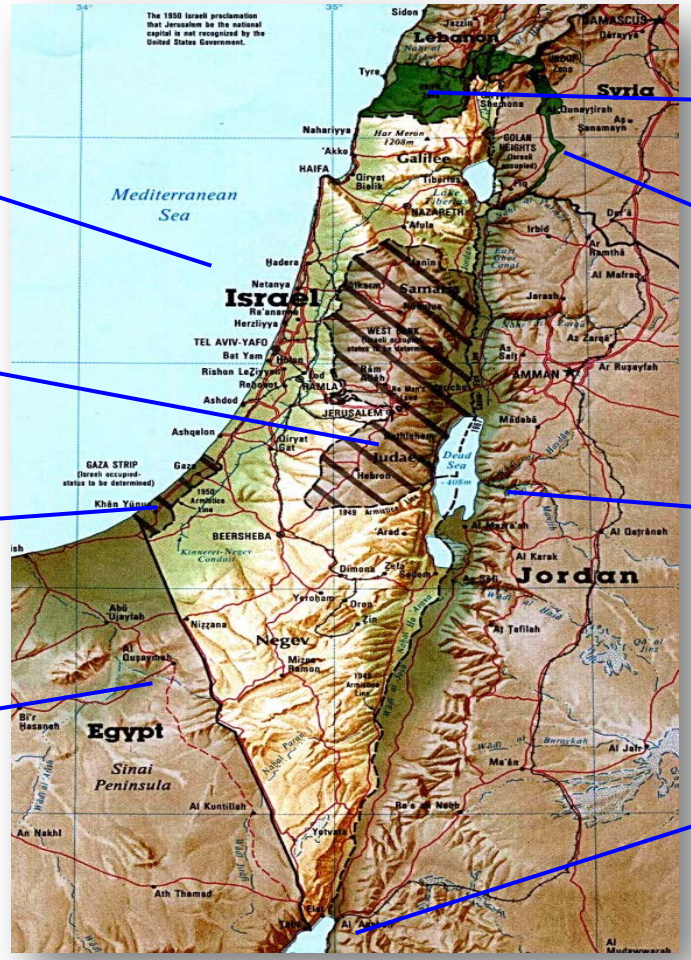
Border Crossing Environment

Mediterranean sea – 196 KM

West bank 330 KM

Gaza Strip – 59 KM

Egypt – 208 KM



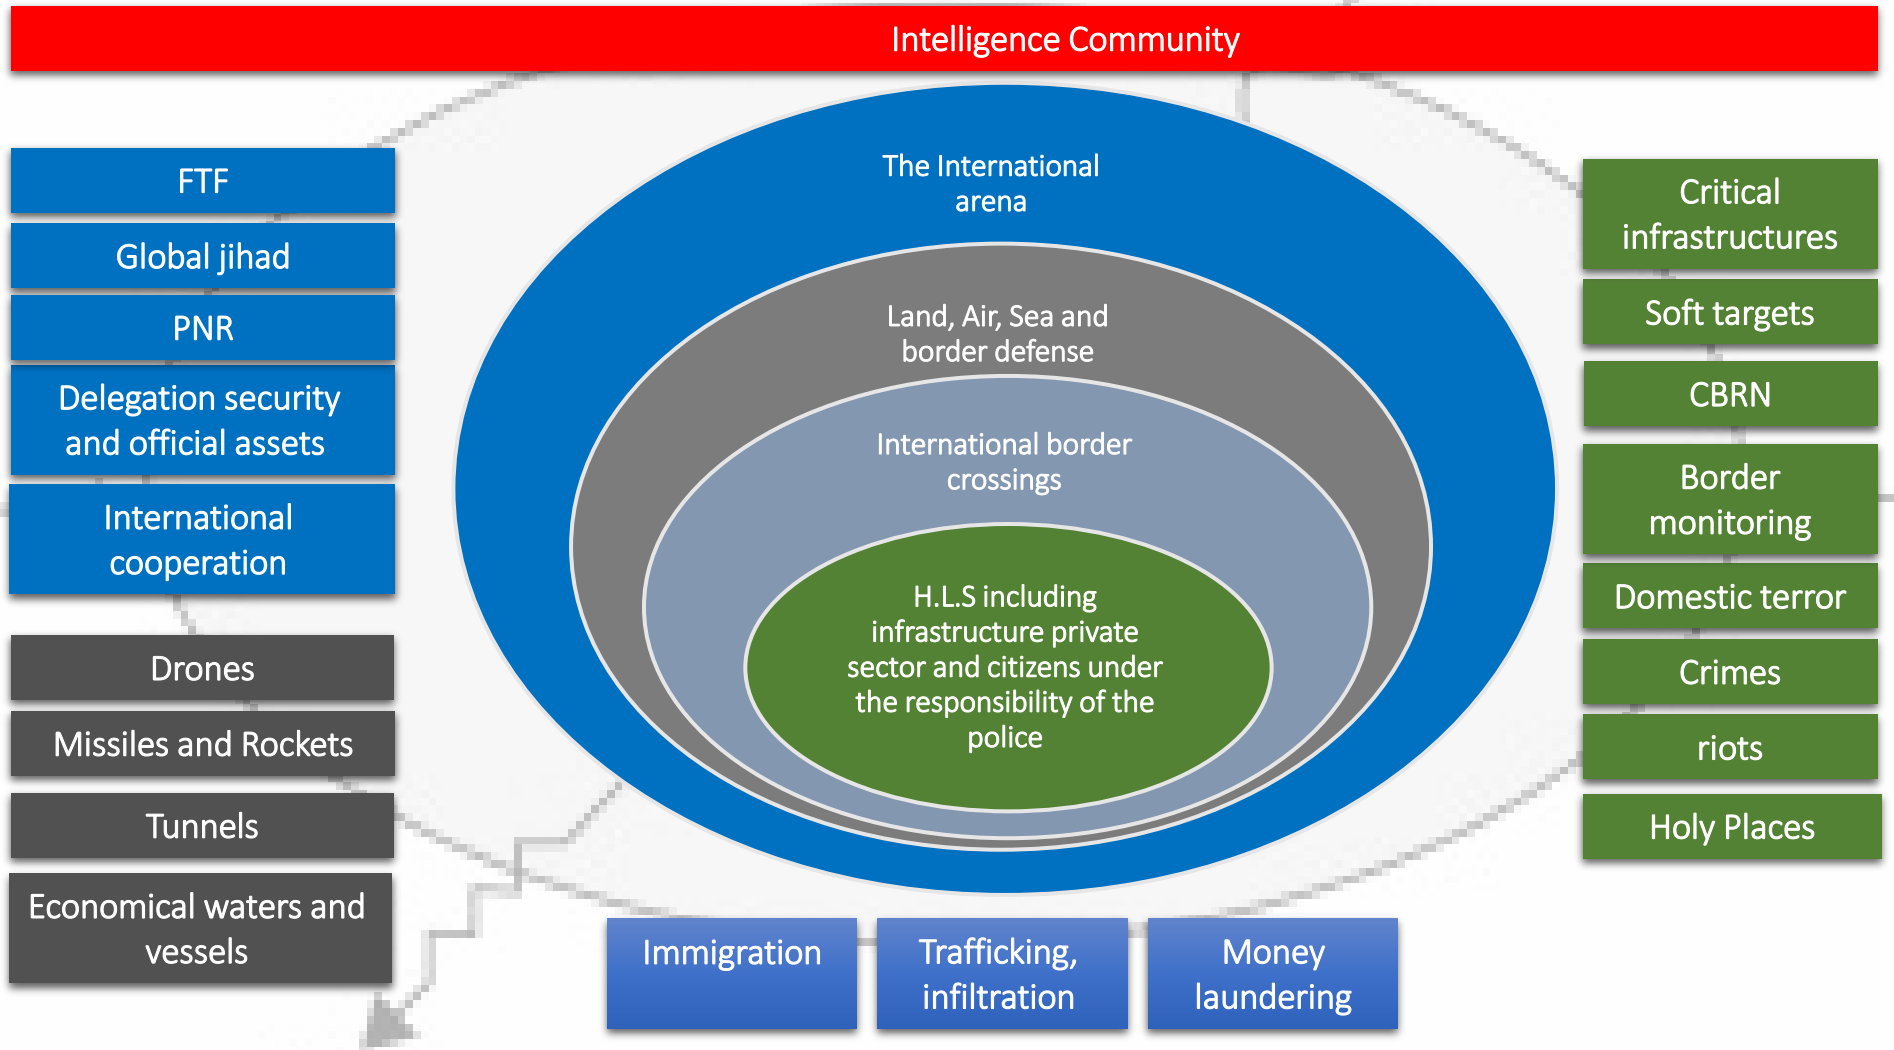
Lebanon – 79 KM

Syria – 92 KM

Jordan – 309 KM

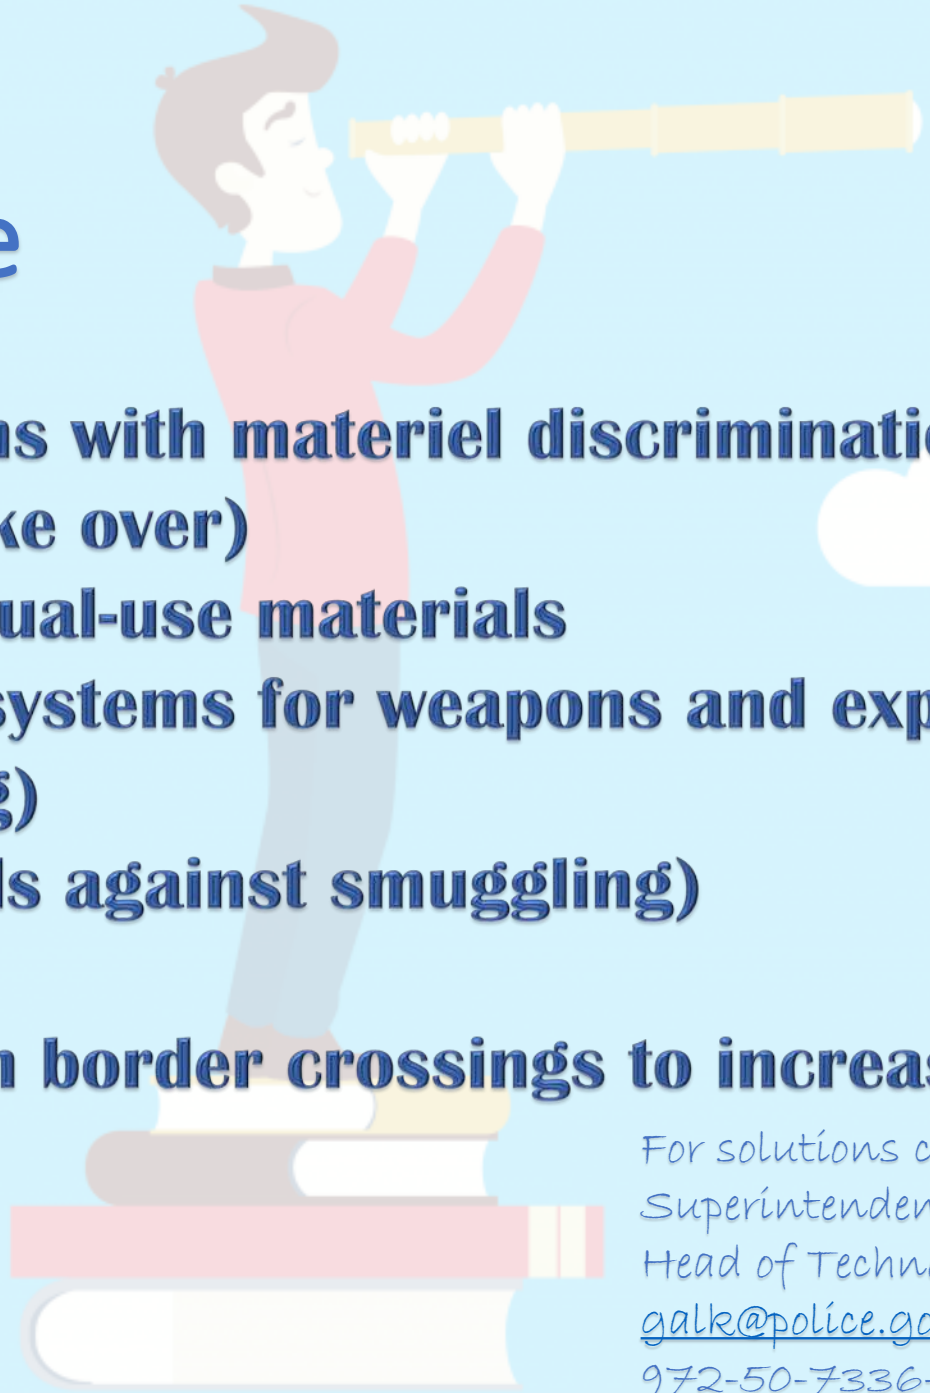
1273 KM

Policy – prevention – Government Decision



Regulators & Operators

Points for the future



* Cargo inspection systems with materiel discrimination
* Anti drones systems (take over)
* Quick identification of dual-use materials
* Mass-crowd inspection systems for weapons and explosives (including shoes checking)
* Yacht (methods and tools against smuggling)
* A.I for x-ray imaging
* Use of video-analytics on border crossings to increase the trucks flow
