

Advanced Developments
Encompassing Processes and Technologies (CBP-ADEPT)
Workshop 2:

Advanced Development and Processes for Tomorrow

Third Party Involvement And Communication Standards

Carl R. Crawford
Csuptwo, LLC

So What? Who Cares?

- Parties
 - First: CBP
 - Second: Existing vendors to CBP
 - Third: New companies assisted by academia, national labs, investors
- Third party involvement
 - Can be used to augment the capabilities and capacities and existing vendors
 - CBP procurements will cause involvement automatically
 - CBP can fund involvement.
 - Complicated because of deployment, IP, vendor financials
 - Algorithms first (ATR, big data); hardware later
- Communication Standards
 - Development complicated
 - White House (OMB) says no government standards
 - Better to be driven vendor
 - Learn from UFF, DICOM, DICOS
- Much more discussion required on these topics
 - ADEPT03?
