

Algorithm Development for Security Applications (ADSA)
Workshop 7:

CT-Based Explosive Detection Equipment: Improved
Reconstruction and Accelerated Deployment

Call To Order
Day 1

Carl R. Crawford
Csuptwo, LLC

ADSA Novices and Veterans

■ Novices

- Will be brought up to speed
- Please introduce yourselves to me, Harry Martz and to ALERT

■ Veterans

- Be patient while novices brought up to speed

Rule #1 – Open Discussions

- This is a workshop, not a conference, symposium or tutorial
 - Talks do not address all topics
 - Discussion required to fill in gaps
 - Fewer presentations than previous workshops to allow more time for discussion.
- Conversation expected at all times, especially during formal presentations
- Applies to participants from academia, industry, government and national labs
- Moderators responsible for keeping discussions focused
- Presenters not expected talk for their complete time slot
- Not grip-and-grin
